Laboratory mouse strains have a convoluted history but are ultimately derived from admixture between house mice of different subspecies. The ancestors of laboratory strains most likely originated in northern Europe and Japan (Beck et al., 2000, Nishioka, 1995, Yang et al., 2011). Wild mice, the relatives of laboratory mouse strains, live in close proximity to humans in their natural habitat and ...

1. Introduction 1.1. Innovation for sustainability. Innovation has always been critical for long-term business success. Throughout history, organizations which have innovated successfully have typically been rewarded with growth, profits and access to new markets (Bessant and Tidd, 2007). Those organizations which fail to innovate risk being disrupted and made obsolete in a process described ...

Historians of science and of religion, philosophers, theologians, scientists, and others from various geographical regions and cultures have addressed various aspects of the relationship between religion and science. Even though the ancient and medieval worlds did not have conceptions resembling the modern understandings of "science" or of "religion", certain elements of modern ideas on the ...

A simulation is an approximate imitation of the operation of a process or system; the act of simulating first requires a model is developed. This model is a well-defined description of the simulated subject, and represents its key characteristics, such as its behaviour, functions and abstract or physical properties.
