Dispatches from the Future of Food. Not long after tasting the first cultured beef burger (aka Google Burger, Franken Burger, lab-grown burger), and just a few days after declaring, only half-jokingly, on NPR's Science Friday that I am the Neil Armstrong of lab meat, a friend asked me a very good question. If not lab beef, then what?

In the People's Republic of China, the adulteration and contamination of several food and feed ingredients with inexpensive melamine and other compounds, such as cyanuric acid, ammeline and ammelide, are common practice. These adulterants can be used to inflate the apparent protein content of products, so that inexpensive ingredients can pass for more expensive, concentrated proteins.

Credits: 1. Prerequisite: Middle school biology and chemistry. Recommended: 9th or 10th Test Prep: CLEP Biology This course covers the basic material for this exam, but this is considered a very hard test, and I would suspect more will need to be studied to learn everything required for this huge exam. It's worth the same as two college courses which is why it covers so much.

Lupus is a chronic, inflammatory autoimmune disorder. It is a condition in which the immune system, which normally protects the body from infections, produces an inappropriate immune response against its own tissues. Lupus may affect the skin, joints, blood vessels, and internal organs, especially the kidneys, heart, lungs, and brain. There are several types of lupus; the most common is systemic ...

Yesterday, I discussed protein a little bit, and it's such an important topic that I think it deserves its own Tuesday 10 (Read all Tuesday 10 columns here). In all the debates this year about sugar (carbohydrates) and hydrogenated oil (fat), we forget that protein warrants consideration as well ...
