Questions and Answers - UT CMHC

Write the questions down. Use email, Piazza/discussion-board, or class time to share questions with the instructor, TA, or other students. Google other online resources and do some background research. If the instructor has created learning modules with questions in Quest, write down the questions and how they were connected to the video lectures.

Find the gravitational potential energy associated with the child relative to the child's lowest position under the following conditions: a) when the ropes are horizontal. Answer in...

UT Physics Quest Help? | Yahoo Answers

Decades of experience providing university-level assessment and engagement. Started in the early 90s at the University of Texas at Austin in the Department of Physics, Quest Learning & Assessment is now provided to the educational community by the UT-Austin College of Natural Sciences to support quality STEM content to students.

Quest Learning & Assessment - The University of Texas at ...

Best Answer: To determine the horizontal component you have to break the movement down into vectors. You will have a right triangle in which the left angle is 35, the angle at the top right is a right angle (90) and the angle at the bottom right is the remaining value that will make the three

angles equal 180 as the interior angles of a triangle always equal 180 degrees.
