PROBABILITY THEORY: THE LOGIC OF SCIENCE by E. T. Jaynes Wayman Crow Professor of Physics Washington University St. Louis, MO 63130, U.S.A. Dedicated to the Memory of Sir Harold Jeffreys, who saw the truth and preserved it.

PROBABILITY THEORY -- THE LOGIC OF SCIENCE

In probability theory, conditional probability is a measure of the probability of an event (some particular situation occurring) given that another event has occurred. If the event of interest is A and the event B is known or assumed to have occurred, "the conditional probability of A given B", or "the probability of A under the condition B", is usually written as $P(A | B)$, or sometimes $P_B(A)$...

The Monty Hall problem is a brain teaser, in the form of a probability puzzle, loosely based on the American television game show Let's Make a Deal and named after its original host, Monty Hall. The problem was originally posed (and solved) in a letter by Steve Selvin to the American Statistician in 1975 (Selvin 1975a), (Selvin 1975b). It became famous as a question from a reader's letter quoted ...

Research on a new metaheuristic for optimization is often initially focused on proof-of-concept applications. It is only after experimental work has shown the practical interest of the method that researchers try to deepen their understanding of the method's functioning not only through more and more sophisticated experiments but also by means of an effort to build a theory.
