In statistics, the Pearson correlation coefficient (PCC, pronounced / ' p iər s ən /), also referred to as Pearson's r, the Pearson product-moment correlation coefficient (PPMCC) or the bivariate correlation, is a measure of the linear correlation between two variables X and Y. According to the Cauchy-Schwarz inequality it has a value between +1 and -1, where 1 is total positive linear ...

The dependent variables were drawn from two sets of questions. While this study only reports information from respondents in the United States, an 11-point scale was used to facilitate international implementation of the survey (Calantone et al., 1996). The first set of 10 questions asked the respondents to assess the impact of environmental activities on various dimensions of the firm (0 ...

Science in a broad sense existed before the modern era and in many historical civilizations. Modern science is distinct in its approach and successful in its results, so it now defines what science is in the strictest sense of the term. Science in its original sense was a word for a type of knowledge, rather than a specialized word for the pursuit of such knowledge. In particular, it was the ...

Compost is organic material that can be added to soil to help plants grow. Food scraps and yard waste together currently make up about 30 percent of what we throw away, and should be composted instead. Making compost keeps these materials out of landfills where they take up space and release methane ...

David Ray Griffin, PhD – Professor Emeritus, Philosophy of Religion and Theology, Claremont School of Theology. Author/editor of over two dozen books, Prof. Griffin first questioned the 9/11 official story in 2003 while exploring a 9/11 timeline filled with reliable, verifiable facts suggesting a major cover-up. He then switched his focus from theology to 9/11 research.
