Article Summary: Preparing a wet mount of a specimen is the technique typically used to view plant and animal cells using a microscope. This page provides step by step instructions on slide preparation as well as videos at the bottom of page.

How to Prepare a Wet Mount Slide of Eukaryotic Cells

The following activities from the Access Excellence website can be used to extend this lesson: The Cell can be used to reinforce or reteach the concepts covered in this lesson. In this activity, student groups investigate individual cell structures for both plant and animal cells.

Cells 1: Make a Model Cell - Science NetLinks

This site serves as a resource site for students in Biology 1 & 1A. The goal of this course is to provide a general overview of major biological topics, provide opportunities for laboratory investigations, and expose students to current advances in biology and medicine.

Biology 1 & 1A

Pollination occurs when pollen grains land on the sticky surface of the stigma and are trapped there. The pollen grain germinates and a pollen tube emerges from the grain. It releases special enzymes that digest a cell the wall on the surface of the stigma. The pollen tube grows down through the style to the ovary and enters the ovule, making a continuous passageway for the two sperm nuclei to ...

Credits: 1. Prerequisite: Middle school biology and chemistry. Recommended: 9th or 10th Test Prep: CLEP Biology This course covers the basic material for this exam, but this is considered a very hard test, and I would suspect more will need to be studied to learn everything required for this huge exam. It's worth the same as two college courses which is why it covers so much.

Biology with Lab - Easy Peasy All-in-One High School

The plant shoot system is a complex network of a number of different parts all working to keep the plant healthy and growing. It is fascinating how much is involved in what we usually look at as a ...
