Jean-Louis Brillet (2011). Structural econometric modelling: Methodology and tools with applications under EViews describes how to use the model object in EViews to solve structural economic models. This book provides step-by-step examples of using EViews for modelling and easy to follow descriptions of economic modelling theory and its applications.

Books & Publications - EViews

EViews (Econometric Views [citation needed]) is a statistical package for Windows, used mainly for time-series oriented econometric analysis. It is developed by Quantitative Micro Software (QMS), now a part of IHS. Version 1.0 was released in March 1994, and replaced MicroTSP. The TSP software and programming language had been originally developed by Robert Hall in 1965.

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.

Scholars have conceptualized leadership as a dynamic social process, whereby the interactions that group members have with each other can impact who emerges as a leader (Lord & Dinh, 2014). Identity is the social lens through which people make sense of and interact with their environment (Markus & Wurf, 1987). Identity scholars have argued that identity plays a key role in shaping and guiding ...
