THE MOVIE PHYSICS RATING SYSTEM. In the name of physics decency, to protect the minds of children everywhere, so that they may grow up in a world where they know the difference between speed and velocity, we have taken the responsibility to rate movies for their portrayal of excessively bad physics.

Recall from the ideal gas law that  $PV = nRT$ . If  $n$ , the amount of gas, does not change, then  $PV \propto T$ . We can use this relationship to determine how the temperatures at different positions on a PV-diagram would compare.

Temperature scales differ in two ways: the point chosen as zero degrees, and the magnitudes of incremental units or degrees on the scale. The Celsius scale ( $^{\circ}\text{C}$ ) is used for common temperature measurements in most of the world. It is an empirical scale that was developed by a historical progress, which led to its zero point  $0^{\circ}\text{C}$  being defined by the freezing point of water, and additional ...

Particle Wave Duality is False. Authors: Adham Ahmed Mohamed Ahmed Comments: 1 Page. ty if you push a mass to the speed of light it takes a lot of work now if you push a larger mass it take a larger work to push it at a time larger by the larger mass/mass coefficient velocity here is all that matters do you think electromagnetic waves has inertia if it has mass do waves have inertia? arent ...
