The meltdown at the nuclear power plant in Chernobyl released radioactive particles and energy that can damage cells. This damage to cells can be - 2821072

### **The meltdown at the nuclear power plant in Chernobyl ...**

Biodiversity is not evenly distributed, rather it varies greatly across the globe as well as within regions. Among other factors, the diversity of all living things depends on temperature, precipitation, altitude, soils, geography and the presence of other species. The study of the spatial distribution of organisms, species and ecosystems, is the science of biogeography.

### **Biodiversity - Wikipedia**

Diversity definition is - the condition of having or being composed of differing elements : variety; especially : the inclusion of different types of people (such as people of different races or cultures) in a group or organization. How to use diversity in a sentence.

Herbivores are dependent on plants for food, and have coevolved mechanisms to obtain this food despite the evolution of a diverse arsenal of plant defenses against herbivory. Herbivore adaptations to plant defense have been likened to "offensive traits" and consist of those traits that allow for increased feeding and use of a host. Plants, on the other hand, protect their resources for use in ...
