

## *Parallelogram Proofs Answers*

[Download File PDF](#)

*Parallelogram Proofs Answers - Getting the books parallelogram proofs answers now is not type of challenging means. You could not unaided going past ebook heap or library or borrowing from your links to read them. This is an enormously easy means to specifically acquire lead by on-line. This online revelation parallelogram proofs answers can be one of the options to accompany you later than having further time.*

*It will not waste your time. tolerate me, the e-book will unconditionally freshen you extra thing to read. Just invest little get older to right to use this on-line notice parallelogram proofs answers as with ease as review them wherever you are now.*

**Parallelogram Proofs Answers**

A parallelogram is a quadrilateral with opposite sides parallel (and therefore opposite angles equal). A quadrilateral with equal sides is called a rhombus, and a parallelogram whose angles are all right angles is called a rectangle. And, since a square is a degenerate case of a rectangle, both squares and rectangles are special types of parallelograms.

Quadrilaterals. In other modules, we defined a quadrilateral to be a closed plane figure bounded by four intervals, and a convex quadrilateral to be a quadrilateral in which each interior angle is less than  $180^\circ$ . We proved two important theorems about the angles of a quadrilateral: The sum of the interior angles of a quadrilateral is  $360^\circ$ .

A trapezoid is a quadrilateral with two sides parallel. The trapezoid is equivalent to the British definition of trapezium (Bronshtein and Semendyayev 1977, p. 174). An isosceles trapezoid is a trapezoid in which the base angles are equal so  $c=d$ . A right trapezoid is a trapezoid having two right angles. The area of the trapezoid is  $A = \frac{1}{2}(a+b)h$  (1)  $= mh$  (2)  $= \frac{1}{4}(b+a)/(b-a)\eta$ .

### Trapezoid -- from Wolfram MathWorld

$+ 9x + 14$ , older students can see the 14 as  $2 \times 7$  and the 9 as  $2 + 7$ . They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for
