Natural Resources And Recycling The Earth is a closed system. For our examples, we need to think that nothing comes in (except energy) and nothing goes out (except energy).

Geography4Kids.com: Biosphere: Natural Resources

A biome is an ecological community of plants and animals, soil and water and air, living together in a particular climatic zone. There are six land biomes: arctic tundra, taiga, temperate deciduous forest, tropical rain forest, tropical savannah, and desert. Each biome has specific climatic conditions - temperature, precipitation amounts, soil conditions, vegetation, and animals.

Biomes - NEXT.cc

An ocean (from Ancient Greek Ὠκεανός, transc. Okeanós) is a body of water that composes much of a planet's hydrosphere. On Earth, an ocean is one of the major conventional divisions of the World Ocean. These are, in descending order by area, the Pacific, Atlantic, Indian, Southern (Antarctic), and Arctic Oceans. The word "ocean" is often used interchangeably with "sea" in American English.
