Using `os.path.split` or `os.path.basename` as others suggest won't work in all cases: if you're running the script on Linux and attempt to process a classic windows-style path, it will fail.. Windows paths can use either backslash or forward slash as path separator. Therefore, the `ntpath` module (which is equivalent to `os.path` when running on windows) will work for all (1) paths on all platforms.

### **Extract file name from path, no matter what the os/path format**

The total cost for our service is as low as \$24.99. Other websites charge between \$60 - \$200. We actually have as many OR MORE questions in our material / database than those other guys do (for example, sites typically have a General Knowledge test bank of about 260 questions - ours has over 300 since it better covers a number of variations that exist in several states).
