The Intermediate Value Theorem. One of the more important theorems relating to continuous functions is the Intermediate Value Theorem, which states that if a function f is continuous on a closed interval $[a, b]$ and k is any number between $f(a)$ and $f(b)$, then there must exist at least one number c such that $f(c) = k$. In other words, if f is continuous on $[a, b]$, it must pass through every y ...

I've created this special page on my blog to house all of the posters I have created for my classroom over the past few years. I have made them free for you to download and use in your own classroom as a way to say thank you to the thousands of people I've stolen teaching ideas from on the internet.
