#2: Factor the following problem completely. In this problem, the greatest common factor includes both numbers and variables. First we need to factor out the greatest number that will divide into both 15 and 9. In this case, it will be a 3. Next we need to factor out the smallest power of the variable x that can be seen in the problem. In this case, it will be .

The previous part of Lesson 2 discussed the relationship between work and energy change. Whenever work is done upon an object by an external force, there will be a change in the total mechanical energy of the object. If only internal forces are doing work (no work done by external forces), there is no change in total mechanical energy; the total mechanical energy is said to be conserved.
