1. Introduction. Diagenesis refers to the physical and chemical changes that occur during conversion of sediment into sedimentary rock. The prefix dia-and root -genesis are both from Greek and mean "through" or "across" and the "origin or mode of formation", respectively. Together, they refer to the formation of a sedimentary rock through its entire volume.

The octanol-water partition coefficient K_p , calculated or experimentally determined for new molecules to describe their lipophilic/hydrophilic nature and to make predictions on their behaviour in biological systems, can suggest how the drug will distribute in two-phase solvent systems. Because both octanol and water show some finite solubility in one another, the K_p value can only be ...

In Depth News

Prostate-specific antigen (PSA), also known as gamma-seminoprotein or kallikrein-3 (KLK3), is a glycoprotein enzyme encoded in humans by the KLK3 gene. PSA is a member of the kallikrein-related peptidase family and is secreted by the epithelial cells of the prostate gland. PSA is produced for the ejaculate, where it liquefies semen in the seminal coagulum and allows sperm to swim freely.
