Pre-AP Algebra 2 Lesson 1-6 – Piecewise Functions Objectives: The students will practice answering graphical analysis questions (focus on absolute value questions), including operations with two functions on the same set of axes. The students will be able to graph a piecewise function (using only linear components).

- [Voiceover] By now we're used to seeing functions defined like $h(y)=y^2$ or $f(x)=$ to the square root of x . But what we're now going to explore is functions that are defined piece by piece over different intervals and functions like this you'll sometimes view them as a piecewise, or these types of function definitions they might be called a piecewise function definition.
