An artificial neural network is a network of simple elements called artificial neurons, which receive input, change their internal state (activation) according to that input, and produce output depending on the input and activation.. An artificial neuron mimics the working of a biophysical neuron with inputs and outputs, but is not a biological neuron model.

Definition. A matrix is a rectangular array of numbers or other mathematical objects for which operations such as addition and multiplication are defined. Most commonly, a matrix over a field  $F$  is a rectangular array of scalars each of which is a member of  $F$ . Most of this article focuses on real and complex matrices, that is, matrices whose elements are real numbers or complex numbers ...
