A mirror is an object that reflects light in such a way that, for incident light in some range of wavelengths, the reflected light preserves many or most of the detailed physical characteristics of the original light, called specular reflection. This is different from other light-reflecting objects that do not preserve much of the original wave signal other than color and diffuse reflected ...

FIRST MEMORY. Author's Note: This poem really is about my earliest memory: I must have been two or three years old. I had climbed up onto the sink in the bathroom, opened the medicine cabinet, taken out my mother's lipstick and was trying to apply it to my own face when my grandfather caught a glimpse of me.
