This article shows how you can prototype and deploy an IoT system with data analytics without developing custom web software or servers. The workflow is based on MATLAB ® and ThingSpeak™, an analytic IoT platform that can run MATLAB code on demand in the cloud. To illustrate the workflow we'll create a tidal forecasting system that boaters can use to predict the effect of wind on water ...

Taken together, these seven areas have big implications for how – even whether – we are able to address global challenges. Positive developments abound, but the deep shifts in mindset and attitudes represented by the rise of nationalism, the growth of consumerism or the emergence of the ‘onlife’ are pushing in the opposite direction.
