This homework covers the topic of sound and uses the simulation to assist understanding of key concepts. The homework consists of two multiple part problems facilitated with the sound applet. This activity was developed in 2003 before most of our research with PhET interviews and before we developed the Inquiry Guidelines.

True False In this simulation, a darker shade of gray indicates an increase in pressure compared to the undisturbed air pressure. True False To increase the volume of a tone at 400 Hz heard by the listener, the speaker must oscillate back and forth more times each second than it does to produce the tone with lower volume.
