October Sky Projectile Motion Answer Key

Generally speaking, projectile motion problems involve objects that are thrown, shot, or dropped. Usually the object will be launched directly upward or dropped directly down. Consider the following example: An object is launched directly upward at 19.6 m/s from a 58.8-meter tall platform.

Quadratic Application: Projectile Motion

Quadratic equations and Vertical Motion 1 Introduction In the movie October Sky, Homer and Quentin were able to use mathematics to locate a missing rocket. To determine where the rocket landed, they had to use more advanced mathematics than algebra. However, using only algebra, the vertical motion of objects in free-fall (such as a model rocket)

Quadratic equations and Vertical Motion - Texas Instruments

Projectile Motion and Quadratic Functions I. ASSESSMENT TASK OVERVIEW & PURPOSE: The student will examine the path of a projectile and explain the motion using a quadratic function. Neglecting air resistance, projectiles follow the path of a parabola in nature.

Projectile Motion and Quadratic Functions - radford.edu

This is always true for these up/down projectile motion problems. (If you have an exercise with sideways motion, the equation will have a different form, but they'll always give you that equation.) The initial velocity is the coefficient for the middle term, and the initial height is the constant term.

Speaking of movies, I was on the mathbits.com website and they listed many movies (clips) with worksheets. I was planning on showing October Sky to my AB kids and there was a projectile motion worksheet that went along with the clip. Has anybody seen this and if so, would they be willing to share solutions so I can check mine. Thanks.

Math Forum Discussions

Projectile Motion An object is thrown straight up from the top of a building h feet tall with an initial velocity of v feet per second. The height of the object as a function of time can be modeled by the function $h(t) = -16t^2 + vt + h$, where $h(t)$ is the height of the object (in feet) t seconds after it is thrown.
