In my recent Context of Calories post, I explained how the different macronutrients we eat at each meal (fats, proteins, and carbohydrates) have different effects in the body. I suggested that, despite their raw calorie values, it's far more important to get a lasting intuitive sense of how much ...

How to Eat According to the Primal Blueprint

Key Findings and Conclusion. Halal status of ethanol is highly controversial but rarely classified based on its source and concentration. Any ethanol produced by anaerobic fermentation and ranging between 1 and 15% is considered to be Haram (non-Halal, Forbidden), whereas ethanol produced by natural fermentation and less than 1% is considered as preserving agent and its Halal status is allowed.

Ethanol and its Halal status in food industries ...

The vast range of maximum lifespan differences between species provides convincing evidence that longevity is genetically influenced. An elephant lives about 10–20 times longer than a mouse, yet both animals have roughly the same number of lifetime heartbeats — the elephant at 30 per minute and the mouse at 300 per minute.
