I'm taking probability and statistics 101, and while I understand Permutations and Combinations, there's this problem (and problems like this) I just don't understand. Could someone please explain (in detail a child could understand) how to answer this problem? A horse race has 12 entries. Assuming that there are no ties, what is the probability that three horses owned by one person finish ...

Permutation/Combination Probability Problem: HELP ...

Combinations and Permutations What's the Difference? In English we use the word "combination" loosely, without thinking if the order of things is important. In other words: "My fruit salad is a combination of apples, grapes and bananas" We don't care what order the fruits are in, they could also be "bananas, grapes and apples" or "grapes, apples and bananas", its the same fruit salad.
