Ego psychology is a school of psychoanalysis rooted in Sigmund Freud's structural id-ego-superego model of the mind.. An individual interacts with the external world as well as responds to internal forces. Many psychoanalysts use a theoretical construct called the ego to explain how that is done through various ego functions. Adherents of ego psychology focus on the ego's normal and ...

Educational Psychology Interactive: Readings in ...

MFT proposes that the human mind is organized in advance of experience so that it is prepared to learn values, norms, and behaviors related to a diverse set of recurrent adaptive social problems (specified below in Table 2.1). We think of this innate organization as being implemented by sets of related modules which work together to guide and constrain responses to each particular problem.
