Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.

History of CT and Evolution of Spiral Scanners. The term tomography stems from the Greek word "tomos" meaning "section". 1 Scientists and mathematicians have described, "body section radiography" in many different ways since the 1920's. It wasn't until the 1960's after much research, that the world's first CT scanner emerged. 1,2 The inventor was Godfrey Newbold Hounsfield, born in England ...

A telecommunications company was seeking to improve its customer service. Rather than trying to influence mind-sets by, for example, posting signs urging employees to be polite to disgruntled customers, or having employees undergo empathy training, the company focused on what psychologists call a "precursor behavior" — a seemingly innocuous behavior that reliably precedes the occurrence ...
