To measure these properties, the physical biochemist will study the interaction of molecules with different kinds of radiation, and their behavior in electric, magnetic, or centrifugal fields. This text emphasizes the basic principles that underlie these methodologies. In this introductory chapter, we briefly review some of the basic principles of

Principles of Physical Biochemistry - USP

GENERAL PRINCIPLES In physical biochemistry, we are interested in studying the physical properties of biological macromolecules, including proteins, RNA and DNA, and other biological polymers (or biopolymers). These physical properties provide a description of their structures at various levels, from the atomic level to large multisubunit assemblies.
