Mathematical physics refers to the development of mathematical methods for application to problems in physics. The Journal of Mathematical Physics defines the field as "the application of mathematics to problems in physics and the development of mathematical methods suitable for such applications and for the formulation of physical theories". It is a branch of applied mathematics, but deals ...

Maxwell's equations are a set of coupled partial differential equations that, together with the Lorentz force law, form the foundation of classical electromagnetism, classical optics, and electric circuits. The equations provide a mathematical model for electric, optical, and radio technologies, such as power generation, electric motors, wireless communication, lenses, radar etc. Maxwell's ...

The Fourier transform of a function is implemented the Wolfram Language as `FourierTransform[f, x, k]`, and different choices of `and` can be used by passing the optional `FourierParameters-> a, b` option. By default, the Wolfram Language takes `FourierParameters` as `.` Unfortunately, a number of other conventions are in widespread use. For example, `is` used in modern physics, `is` used in pure mathematics ...
