Genetics: Punnett Squares Practice Packet Bio Honors Most genetic traits have a stronger, dominant allele and a weaker, recessive allele. In an individual with a heterozygous genotype, the dominant allele shows up in the offspring and the recessive allele gets covered up and doesn't show; we call this complete dominance.

Punnett Square Practice quiz. Choose your answers carefully after you have run the square. READ each question twice to make sure you are answering what it asks!

### **Quia - Punnett Square Practice quiz**

These simple problems were designed for beginners to genetics, students practice determining whether letter combination represents heterozygous or homozygous alleles. They set up punnett squares for simple single allele traits.

### **Simple Genetics Practice Problems - The Biology Corner**

Each genotype shown in the Punnett Square has a 25% chance of occurring. If the same genotype appears in more than one square, the probabilities are added: 1 square = 25% probability 2 squares = 50% probability 3 squares = 75% probability If the same genotype appears in all 4 boxes, 100% of the offspring will have that genotype.
