In probability theory, an event is a set of outcomes of an experiment (a subset of the sample space) to which a probability is assigned. A single outcome may be an element of many different events, and different events in an experiment are usually not equally likely, since they may include very different groups of outcomes. An event defines a complementary event, namely the complementary ...

Nurse Leader Interview Essay - 1613 Words

Miller: No, I certainly don't think they do. I think the whole tradition of Western science is that science and religion are not mutually exclusive. There are many people in the scientific community, in the United States and around the world, who hold strong religious points of view and do not see their points of view conflicting with working in science or even with the philosophy of science.
