In this chapter, I provide argument and evidence that the scope of people's ignorance is often invisible to them. This meta-ignorance (or ignorance of ignorance) arises because lack of expertise and knowledge often hides in the realm of the "unknown unknowns" or is disguised by erroneous beliefs and background knowledge that only appear to be sufficient to conclude a right answer.

In positive psychology, a flow state, also known colloquially as being in the zone, is the mental state of operation in which a person performing an activity is fully immersed in a feeling of energized focus, full involvement, and enjoyment in the process of the activity. In essence, flow is characterized by complete absorption in what one does, and a resulting loss in one's sense of space and ...

21 Questions to Test How Well You Really Know Your Partner

As we have noted in our discussions of the self-concept, our sense of self is partly determined by our cognition. However, our view of ourselves is also the product of our affect, in other words how we feel about ourselves. Just as we explored in Chapter 2, cognition and affect are inextricably linked.

A test score is a piece of information, usually a number, that conveys the performance of an examinee on a test. One formal definition is that it is "a summary of the evidence contained in an examinee's responses to the items of a test that are related to the construct or constructs being measured."

Test score - Wikipedia

Learning Objectives. Describe the concept of the looking-glass self and how it affects our self-concept. Explore the impact of the labeling bias, self-labeling, and internalized prejudice on people's self-concepts, particularly in those from marginalized social groups.
