When our spacecraft strikes the interstellar medium, the medium changes its speed from zero to 60,000 km/s. A change in momentum is caused by an impulse. The impulse on the interstellar medium is equal and opposite to the impulse on the spacecraft. We only care about the magnitudes in this problem, so we won't bother with a negative sign.

Impulse & Momentum - Practice - The Physics Hypertextbook

Within this lesson, students use a triangular model of an object's impulse to determine the impulse, force and time of an event within a system in the context of a word problem. Students then work in pairs to use their understanding of impulse to complete a set of practice problems. Finally, students complete a set of physics quick checks on ...
