A comparative study conducted by Logan et al. (2012) indicated that both entertainment and informativeness have a significant impact on the value of social media ads and TV ads. Another significant relationship was also noticed by Logan et al. (2012) between advertising value and customers' attitudes. However, Logan et al. (2012) disproved the impact of irritation on the advertising value.

Database normalization is the process of structuring a relational database [clarification needed] in accordance with a series of so-called normal forms in order to reduce data redundancy and improve data integrity. It was first proposed by Edgar F. Codd as an integral part of his relational model.. Normalization entails organizing the columns (attributes) and tables (relations) of a database to ...

In the context of relational databases, a foreign key is a field (or collection of fields) in one table that uniquely identifies a row of another table or the same table. In simpler words, the foreign key is defined in a second table, but it refers to the primary key or a unique key in the first table. For example, a table called Employees has a primary key called employee\_id.

The New World Translation. What the Scholars Really Said : The Watchtower and Jehovah's Witness apologists have often cited scholars in support of the New World Translation in general, and particularly its rendering of John 1:1c ("and the Word was a god").Scholarly citation is a form of an "argument from authority."
