Evolution (a) define the term variation Variation is the presence of differences between individuals. This can be within a species or between species. (b) discuss the fact that variation occurs within as well as between species The variation that occurs between species is usually obvious as there are obvious characteristics which separate one species from [...]

Evolution • A* Biology

Biodiversity (b) explain how biodiversity may be considered at different levels; habitat, species and genetic. Habitat – The range of habitats in which different species live. Each habitat will be occupied by a range of organisms. Species – The differences between species. This could be structural differences (between a tree and an ant) or functional [...]
