The radius of a graph is the minimum graph eccentricity of any graph vertex in a graph. A disconnected graph therefore has infinite radius (West 2000, p. 71). Graph radius is implemented in the Wolfram Language as `GraphRadius[g]`. Precomputed radii for many named graphs can be obtained using `GraphData[graph, "Radius"]`.

Graph Radius -- from Wolfram MathWorld

The eccentricity $\text{ecc}(v)$ of a graph vertex v in a connected graph G is the maximum graph distance between v and any other vertex u of G . For a disconnected graph, all vertices are defined to have infinite eccentricity (West 2000, p. 71). The maximum eccentricity is the graph diameter. The minimum graph eccentricity is called the graph radius.

Graph Eccentricity -- from Wolfram MathWorld
