Pigments And Paints Answer Sheet

Artists often mix paints to get specific colors that no single pigment matches exactly. This is especially true for pastel or whitened colors, purples, greens and dark valued (near black) colors. Paint makers often premix and package these recipes as convenience mixtures of two or more pigments. So a paint with the marketing name cyanine blue might actually contain the pigments ultramarine ...

Non-Toxic Nursery Paint: No-VOC Paints for Your Baby's Nursery

laying a wash. A wash is a large area in a watercolor painting where the paint flow and diffusion have been manipulated to efface individual brushstrokes. Within wash areas, color transitions are usually gradual and span analogous hues. Laying a wash — a flawless portrait background or a landscape sky that shades from bright to mist — is one of the most satisfying tasks in watercolor ...

Violet is the color at the end of the visible spectrum of light between blue and the invisible ultraviolet. Violet color has a dominant wavelength of approximately 380-450 nanometers. Light with a shorter wavelength than violet but longer than X-rays and gamma rays is called ultraviolet. In the color wheel historically used by painters, it is located between blue and purple.

Violet (color) - Wikipedia

GAC 100 Medium - Universal acrylic polymer. Is a thin, translucent, gloss medium. Useful for thinning or extending colors as well as increasing flexibility. Wets out solids more readily than other polymers and is useful for creating homemade paints.
