The dependent variables were drawn from two sets of questions. While this study only reports information from respondents in the United States, an 11-point scale was used to facilitate international implementation of the survey (Calantone et al., 1996). The first set of 10 questions asked the respondents to assess the impact of environmental activities on various dimensions of the firm (0 ...

Fig. 2 illustrates the distribution of publications according to sustainability dimensions. 5 The number of papers increased continuously over the years. Interestingly, despite the existence of social and environmental reporting in the 1970/80s (e.g., Fifka, 2012, Kolk, 2010), the growth of sustainability reporting in the new millennium seems to have invigorated the entire field of research.

Science in a broad sense existed before the modern era and in many historical civilizations. Modern science is distinct in its approach and successful in its results, so it now defines what science is in the strictest sense of the term. Science in its original sense was a word for a type of knowledge, rather than a specialized word for the pursuit of such knowledge. In particular, it was the ...
