In economics, profit maximization is the short run or long run process by which a firm may determine the price, input, and output levels that lead to the greatest profit. Neoclassical economics, currently the mainstream approach to microeconomics, usually models the firm as maximizing profit.. There are several perspectives one can take on this problem. First, since profit equals revenue minus ...

Profit maximization - Wikipedia

La administración financiera evoluciona rápidamente, no sólo desde el punto de vista teórico sino también en la práctica. En ese contexto, Fundamentos de administración financiera se ocupa de temas tan actuales como la responsabilidad social corporativa, los dilemas éticos, las reclamaciones en conflicto de los accionistas, el entorno corporativo dinámico, la globalización de las ...

This paper investigates the antecedents and consequences of customer loyalty in an online business-to-consumer (B2C) context. We identify eight factors (the 8Cs—customization, contact interactivity, care, community, convenience, cultivation, choice, and character) that potentially impact e-loyalty and develop scales to measure these factors.

Customer loyalty in e-commerce: an exploration of its ...

A fitted linear regression model can be used to identify the relationship between a single predictor variable x_j and the response variable y when all the other predictor variables in the model are "held fixed". Specifically, the interpretation of β_j is the expected change in y for a one-unit change in x_j when the other covariates are held fixed—that is, the expected value of the partial ...

Linear regression - Wikipedia

Student online book exchange results page. The primary focus of this text is to empower management students with statistical decision-making skills so that they become active

participants rather than passive observers in business situations in which statistical findings are reported and discussed as part of a management decision-making process.
