CSFi software provides standard interfaces to communicate with other systems that are used to approve debit card transactions. CSFi's ATM/debit switching system is typically connected to a host authorizing (or core banking) system which contains the important financial information for the cardholders and their available balances to approve the transaction.

Modern Banking Behavior. The average American's banking behavior is very different now than it was in 2009. 6% of U.S. total banks closed following the financial crisis, and it is projected that 20% of all branches will close by 2020. Retail branch offices have traditionally been a market advantage for local financial institutions, but the need for local bank branches to grow target markets ...
