The natural environment encompasses all living and non-living things occurring naturally, meaning in this case not artificial. The term is most often applied to the Earth or some parts of Earth. This environment encompasses the interaction of all living species, climate, weather and natural resources that affect human survival and economic activity. The concept of the natural environment can be ...

Environmental Ethics. The field of environmental ethics concerns human beings' ethical relationship with the natural environment. While numerous philosophers have written on this topic throughout history, environmental ethics only developed into a specific philosophical discipline in the 1970s. This emergence was no doubt due to the increasing awareness in the 1960s of the effects that ...

We also need to look more closely at how the different variables associated with the zoo environment interact with each other, as there is evidence (e.g. see Wood, 1998) that they do. Thus, there is also a clear need for research into the combined effects of visitor presence, cage complexity and management processes on the behaviour of zoo primates.
