Chemicool - Periodic Table of Elements and Chemistry

The periodic table, also known as the periodic table of elements, is a tabular display of the chemical elements, which are arranged by atomic number, electron configuration, and recurring chemical properties. The structure of the table shows periodic trends. The seven rows of the table, called periods, generally have metals on the left and non-metals on the right.

Periodic Table of the Elements; Cylinder with Bulges. The main purpose of any periodic table of the elements is to help us understand the relationships among the various elements. We want to construct a periodic table; that is a reasonably faithful representation of the observed relationships.

If you want this to run every day at a specific time there's not a great way to do it, because the TimeUnit applies to both the initialDelay and the period. Running every 24 hours will end up being thrown off when DST kicks in, but a TimeUnit of DAYS doesn't let you specify a fine-grained initialDelay. (I think the internal ScheduledExecutorService implementation converts DAYS to nanoseconds ...
