In cryptography, a certificate authority or certification authority (CA) is an entity that issues digital certificates. A digital certificate certifies the ownership of a public key by the named subject of the certificate. This allows others (relying parties) to rely upon signatures or on assertions made about the private key that corresponds to the certified public key.

Certificate authority - Wikipedia

To replace SSL certificate for the AD FS Server in a Office 365 environment, you need to perform some actions to re-establish the proper functionality.. When the SSL certificate expires, the Office 365 authentication process doesn't work and the users are no longer able to access their emails. The replacement of the SSL certificate is the only solution to get the service back.
