Sampling and analysis or visual examination of soil to assess its status and use potential is widely practiced from plot to national scales. However, the choice of relevant soil attributes and interpretation of measurements are not straightforward, because of the complexity and site-specificity of soils, legacy effects of previous land use, and trade-offs between ecosystem services.

In addition to such conspicuous national leaders, many well-known, rank-and-file biologists, especially in the period 1910 - 1925, enthusiastically endorsed the aims of eugenics. The attraction for these biologists was that the new science of genetics appeared to offer a solution to recurrent social problems that had eluded social workers and charitable organizations.

Eugenics | Encyclopedia.com

The methods of molecular biology includes: 1)Hemocytometer for cell count, 2)Restriction enzyme digest(a process of cutting DNA molecules into smaller pieces with special enzymes called restriction endonucleases), 3) DNA ligation (using DNA ligase enzyme that helps in joining the DNA

strands together by catalysing the formation of a phosphodiester bond), 4) Transfection(a process of ...
