Sketch the system of equations represented by Jim's boat's course and Janice's boat's new course. b. Use your graph to determine if there is now a possibility of collision. If so, give the coordinates of the point of collision. Yes; point of possible collision is (0, 2). Which solution set represents possible points of collision between Jim's boat

10.5 Nonlinear Systems

In mathematics and science, a nonlinear system is a system in which the change of the output is not proportional to the change of the input. Nonlinear problems are of interest to engineers, biologists, physicists, mathematicians, and many other scientists because most systems are inherently nonlinear in nature.

Nonlinear system - Wikipedia

A nonlinear system of equations is a system in which at least one of the equations is nonlinear. For example, a system that contains one quadratic equation and one linear equation is a nonlinear system. ... a / 8-10 Nonlinear Systems ///// ...
