Using baseband transmissions, it is possible to transmit multiple signals on a single cable by using a process known as multiplexing. Baseband uses Time-Division Multiplexing (TDM), which divides a single channel into time slots.

Differentiating Between Baseband and Broadband Signaling ...

WARNING. MAC Address Tip Because MAC addresses are expressed in hexadecimal, only the numbers 0 through 9 and the letters A through F can be used in them. If you get a Network+ exam question about identifying a MAC address and some of the answers contain letters and numbers other than 0 through 9 and the letters A through F, you can discount those answers immediately.

Identifying MAC Addresses | Understanding Networking ...

Course Booklets: Offline reading resource; contains only the narrative from the online course. Read, highlight, and review on the go, wherever the Internet is not available. The text is extracted directly from the online course, with headings that have exact page correlations to the online course.
