NLP - Building a Question Answering Model. Learnt a whole bunch of new things. For my final project I worked on a question answering model built on Stanford Question Answering Dataset (SQuAD). In this blog, I want to cover the main building blocks of a question answering model. You can find the full code on my Github repo.

NLP - Building a Question Answering Model

NLP uses a contemporary metaphor taken from computer science to describe the action of one process upon another -- programs. It is often the case in computer programming that one program controls the execution of a number of other programs, selecting which ones will run at which times, and sending them information they'll need in order to function properly.
