A distributed operating system is a software over a collection of independent, networked, communicating, and physically separate computational nodes. They handle jobs which are serviced by multiple CPUs. Each individual node holds a specific software subset of the global aggregate operating system.

Introduction to Monetary Valuation. Economic valuation of ecosystem services can provide decision makers with evidence of the social benefits provided by, and tradeoffs among, regulatory alternatives and other ecosystem management or policy actions. Valuation implies a systematic quantification of benefits and costs realized by society in commensurable (typically monetary) units, using methods ...

The power-interest grid: specific, unique and significant stakeholders. Mitchell et al. have noted that working with a considerable number of stakeholders can be 'bewilderingly complex for managers' (p. 857). Among many stakeholder management researchers, Freeman has identified the dimensions of power and interest as being significant, and suggested the use of a 'Power-Interest Grid ...

Strategic Management of Stakeholders: Theory and Practice ...

To help provide researchers with a way of understanding and researching these categories and their relationships, we propose the use of institutional theory (see DiMaggio and Powell, 1991, DiMaggio and Powell, 1983). This theory has been widely used to study the adoption and diffusion of organizational forms and HRM activities (e.g., Björkman, 2006).

There are many theories that explain how adults learn and each has its own merits. This Guide explains and explores the more commonly used ones and how they can be used to enhance student and faculty learning. The Guide presents a model that combines many of the theories into a flow diagram which can be followed by anyone planning learning. The schema can be used at curriculum planning level ...
