Solar Electric System Design, Operation and Installation An Overview for Builders in the U.S. Pacific Northwest October 2009

## **Solar Electric System Design, Operation and Installation**

Introduction. Galileo orbited Jupiter for almost eight years, and made close passes by all its major moons. Its camera and nine other instruments sent back reports that allowed scientists to determine, among other things, that Jupiter's icy moon Europa probably has a subsurface ocean with more water than the total amount found on Earth.
