En économie, un bien public est un bien non rival. La consommation de ce bien par un agent n'affecte donc pas la quantité disponible pour les autres agents (non-rivalité). Un bien public pur est un bien non rival et non excluable, il est difficile de faire payer l'accès à ce bien (non-excluabilité).

We review the empirical accounting literature that focuses on banking, which is a relatively large industry specific literature. Potential explanations for the prominence of banks in accounting research include the prevalence of financial assets and liabilities in banks, the use of recognized accounting numbers in the prudential regulation of banks, and easier isolation and modeling of banks ...
