Developmental psychology is the scientific study of progressive psychological changes that occur in human beings as they age. Originally concerned with infants and children, it is often called child development or child psychology. As the study of other periods of great change such as adolescence and aging were added, it now encompasses the entire life span, and is also referred to as Lifespan ...

Proficiency in communication and collaboration skills is as essential to nursing practice as expertise in clinical skills (American Association of Critical-Care Nurses, 2005). The Joint Commission (2012) identified ineffective communication among health care professionals as a root cause of sentinel events in hospitals from 2004 to 2012. In addition, Denham et al. (2008) asserted that lack of ...

Sweden maintained its policy of neutrality during World War II. When the war began on September 1, 1939, the fate of Sweden was unclear. But by a combination of its geopolitical location in the Scandinavian Peninsula, successful realpolitik manoeuvring during an unpredictable course of events, and a dedicated military build-up after 1942, Sweden succeeded in keeping its official neutrality ...

This article discusses the gendered nature of politics (as practice) and political science (as an academic discipline). It studies the sex-typing characteristic of most institutions in the modern world and describes how gender shapes the ways people organize, think, and know about the world. The article then identifies the changes that have occurred in politics and political science over the ...
