Earth is the third planet from the Sun, and the only astronomical object known to harbor life. According to radiometric dating and other sources of evidence, Earth formed over 4.5 billion years ago. Earth's gravity interacts with other objects in space, especially the Sun and the Moon, Earth's only natural satellite. Earth orbits around the Sun in 365.26 days, a period known as an Earth year.

Earth - Wikipedia

To better understand Earth's present tectonic style—plate tectonics—and how it may have evolved from single plate (stagnant lid) tectonics, it is instructive to consider how common it is among similar bodies in the Solar System.

Stagnant lid tectonics: Perspectives from silicate planets ...

How to Calculate Future Value Using Excel: 1. The process will be easiest if you use the spreadsheet as a table to keep track of the different variables and periods you'll need for your calculation.

How to Calculate Future Value Using Excel or a Financial ...

Present value is one of the most important concepts in finance. Luckily, once you learn a few tricks, you can calculate it easily. All you need to do is use Microsoft Excel or a financial calculator. But we do understand that it can be a little daunting if you've never done it before. So we'll walk you through the process. Let's start with Excel...
